| Hokkaido pref, -50 % polishing ratio - 16 % alc.<br>Samurai Rice Sake from Asahikawa Distillery in Hokkaido has a deep flavor and sharp taste from the use of very pure rice grains. Traditionally, sake is consumed cold, hot, or on ice as the Samurai used to drink it but also with soda and/or lime juice. Its consumption is recommended for sake-based cocktails, but also with sushi, sashimi, seafood and salmon tartar. |                                              |

|                                                                                                                                                                                                                                                                                                                                                                                                                               |                        |

| Yuzushu literally means “yuzu alcohol” in Japanese. This Sea Salt Yuzushu liqueur is produced by Kitajima Brewery on a sake base, to which fresh yuzu juice and sea salt are added. Founded in 1805 in the village of Hari, Shiga Prefecture, the distillery has been making premium sake for over 200 years. The combination of sake and fresh Japanese yuzu juice creates a remarkable drink with sweet and sour notes. The touch of sea salt softens the acidity and brings out the flavor of the yuzu. Enjoy it neat on ice, with a tonic, or Japanese style with hot water. |                                             |
